Profile

Senior Frontend Engineer with 7+ years of experience building and scaling high-impact web applications in fintech, SaaS, and EdTech environments. Expert in React, Next.js, and TypeScript, with strong focus on production reliability, performance, and maintainable UI architectures. Experienced working in fast-growing, VC-backed startups and critical production systems.

Core Skills

Frontend	React, Next.js, React Native, TypeScript, JavaScript, HTML5, CSS3
State & Forms	Redux, React Hook Form, Zod, Controlled Workflows
UI	Tailwind CSS, Styled Components, Design Systems
Testing	Cypress, Playwright, Jest
Backend	Node.js, Laravel, C#, REST, GraphQL
Databases	MongoDB, PostgreSQL
Cloud	Docker, Azure Functions, Azure Blob Storage
Tooling	Git, GitHub, GitLab, Jira, CI/CD

Professional Experience

11/2023 – **Senior Frontend Web Developer**, *Libélula Soft*, Remote

- Present
 - Led frontend development for a **financial services platform** using React, Next.js, and React Native.
 - Designed complex user workflows with advanced **state and form management** using React Hook Form and Redux, reducing user errors and increasing form completion rates.
 - Built and standardized **reusable UI components** with Tailwind CSS and React, accelerating feature delivery and ensuring design consistency.
 - Reduced production regressions by **50%** by implementing automated testing with Cypress, Playwright, and Jest.
 - Improved code quality and system reliability by adopting **TypeScript strict typing** and well-defined API contracts within a MERN stack.
 - Collaborated closely with backend teams integrating services built in Laravel and C#, improving data flow and overall platform responsiveness.

03/2023 – **Senior Full Stack Engineer**, *Pickatale*, Remote (Norway)

- 11/2023
 - Engineered modular and scalable frontend components using React, Next.js, and TypeScript for an EdTech platform serving thousands of users.
 - Optimized frontend performance and rendering efficiency, improving perceived load times.
 - Developed and maintained GraphQL integrations and backend services using Node.js and MongoDB.
 - Implemented cloud-based media delivery using Azure Blob Storage and serverless workflows with Azure Functions.
 - Worked in a distributed agile team, contributing to architecture decisions and code reviews.

06/2022 – **Full Stack Software Engineer**, *Kruger*, Ecuador

- 05/2023
 - Developed enterprise-grade ERP systems for HR and asset management across multiple countries.
 - Built frontend applications with React, TypeScript, and Tailwind CSS, focusing on usability and maintainability.
 - Implemented Node.js microservices and secured MongoDB clusters for high-traffic environments.

08/2021 – **Full Stack Software Engineer**, *Jalasoft*, Remote

- 01/2023
 - Developed technical assessment platforms used for large-scale candidate evaluations.
 - Implemented complex UI workflows, markdown rendering, and video-based interview features.
 - Designed backend integrations and data models using Node.js and MongoDB.

12/2019 – **Frontend Developer**, *STB Technology*, Ecuador

- 11/2020 ○ Built and refactored enterprise React applications with focus on UX and performance.
- Delivered reusable components and reduced UI maintenance costs.

Education

2018 – 2022 **Bachelor's Degree in Software Engineering**, *Universidad Tecnológica Israel*, Ecuador

Certifications

Microsoft Azure Fundamentals (AZ-900)

Andela React Program (Meta / Pluralsight)

Languages

Spanish Native

English Professional Proficiency (B2–C1)
